09/880,621	06/12/2001	Tracy Garrett Drysdale	42390P11321	5903

TITLE OF INVENTION: METHOD AND APPARATUS FOR COMMUNICATING BETWEEN PROCESSING ENTITIES IN A MULTI-PROCESSOR

APPLN. TYPE	SMALL ENTITY	ISSUE FEE	PUBLICATION FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	NO	\$1400	\$300	\$1700	10/05/2005

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE REFLECTS A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE APPLIED IN THIS APPLICATION. THE PTOL-85B (OR AN EQUIVALENT) MUST BE RETURNED WITHIN THIS PERIOD EVEN IF NO FEE IS DUE OR THE APPLICATION WILL BE REGARDED AS ABANDONED.

#### HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

- A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.
- B. If the status above is to be removed, check box 5b on Part B Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

- A. Pay TOTAL FEE(S) DUE shown above, or
- B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.
- II. PART B FEE(S) TRANSMITTAL should be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). Even if the fee(s) have already been paid, Part B Fee(s) Transmittal should be completed and returned. If you are charging the fee(s) to your deposit account, section "4b" of Part B Fee(s) Transmittal should be completed and an extra copy of the form should be submitted.
- III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

#### PART B - FEE(S) TRANSMITTAL

#### Complete and send this form, together with applicable fee(s), to: Mail

Mail Stop ISSUE FEE Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

or Fax (703) 746-4000

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE	E ADDRESS (Note: Use Block 1 for	any change of address)		Note: A certificate of Fee(s) Transmittal, Tl	f mailing can only be used for	or domestic mailings of the

DATE MAILED: 07/05/2005

## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 680 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 680 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571) 272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

Art Unit: 2183

## Reasons for Allowance

Claims 1-3, 10-12,16-22, 24,29,37-40,45-57,59,66 have been canceled.

None of the prior art of record teaches:

- the combined features of the first register communicating from a first core (or thread) to second core, wherein the first register was decoded by the first core to have a first register name and was decoded by the second core to have a second register name, and the second register communicating from the second core to the first core, wherein the second register was decoded by the first core to have the second register name and decoded by the second core to have the first register name (claims 4,13,);
- 2. the combined features of cores (threads), each associated with a read only register to receive information relating to another core and a read –write register to output information used by another core, the logic operation to the contents of readwrite register of each core and the storage of the result in the read-only register of each core (claims 23,28,33,41);
- 3. the combined features of the first register for communicating **only** from the first core to second core, wherein the first register included bits used to synchronize operation of the first core and second code, and the second register to communicate **only** from the second core to the first core, wherein the second register included a plural bits used to synchronize operation of the first core and second core (Claims 58, 65);

Page 3

Application/Control Number: 09/880,621

Art Unit: 2183

4. the combined features of the first register communicating information form the first entity to second entity of a microprocessor, the second register for communicating the information from the second entity to the first entity, the means for cross decoding the first register and second register, the means causing the first entity to set the predetermined bit in the first register, and the means for causing the first processing entity to wait until the corresponding bit in the second register is set before proceeding (claim 62).

### References of Record

- 5. Torii (5,913,059) was used for showings teaching a plurality of processing entities, or threads (see fig.9 [21a][21b], see the parallel processing of the threads in cool.8, lines 34-42) having associated with a first register [27a] and second register [24a], and the logic operation (see output lines from the 24a in the entity 21a and from 24 b in entity 21b). However, it did not teach the first register was a read-only register and the second register was a read-write register as claimed (e.g. see claims 23,28,33,41).
- 6. Levy et al. (6,092,175) was used to show first processing entity (fist thread) and a second processing entity (second thread), the first register (see any shared register in the register pool), the second register (see any other shared register in the register pool the communication (fig.5 D) between the first processing entity and second processing entity, and the cross decoded of the first entity and second entity (col.10, lines 42-52, see also col.10, lines 5-17 for the renaming registers shared across the threads, see

Application/Control Number: 09/880,621

**Art Unit: 2183** 

also the mapping in the renaming table in col.9, lines 22-32 for the background teaching of mapping). However, it failed to show a single microprocessor and the means for causing the first processing entity to wait until a corresponding bit in the second processing register was set before proceeding (claim 62).

- 7. Delaruelle et al. (5,095,523) was used to supplement the teaching of bit wise operation. However, it did not teach the first register was a read-only register and the second register was a read-write in addition to the plurality of processing cores, each having the read-only and read-write register.
- 8. Schimmel (6,496,909) was used to show the first core (see the thread for requesting the access in col.9, lines 29-35), the second core (see the additional competing threads), a register (shared by the threads) which included a bit [lock bit] used to synchronize the operation of the first and second cores (col.9, lines 29-46, fig.5 entries of memory table storing the lock bit in col.10, lines 25-41). However, it failed to show the first register communicated information only from the first core to second core, and the second register communicated information only from the second core to the first core (e.g. see claim 58).
- 9. Manabe (5,590,326) was used for showing the teaching of a first register [520 lock set up unit] and a second register [520 lock set up unit] and a means for cross decoding the first register and second register between the first processing entity [50 left] and second processing entity [50 right]. However, it failed to show the first register

Application/Control Number: 09/880,621

**Art Unit: 2183** 

communicated information only from the first core to second core, and ht second register communicated information only from the second core to the first core (e.g. see claims 13, 65).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dan Pan whose telephone number is 703 305 9696, or the new number 571 272 4172. The examiner can normally be reached on M-F from 8:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chan, can be reached on 703 305 9712, or the new number 571 272 4162. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
